Hackathon Day 6 - Deployment Preparation & Staging Environment Setup – FURNIRO

Technologies: *NextJS, TailwindCSS, TypeScript, Sanity CMS, Cypress, Postman*

Objective: Industry Standards for Marketplace Deployment and Environment Management.

1. **Staging Environment:**
   - ✓ Hosted on **Vercel**.
   - ✓ Connected **GitHub** repository.
   - ✓ Configured and deployed settings with successful staging.
   - ✓ Securely configure environment variables on the hosting platform.
   - ✓ Validate app functionality in a production-like environment to fix pre-deployment issues.

2. **Managed Stages:**
   - ✓ TRN (Training)
   - ✓DEV (Development)
   - ✓ SIT (System Integration Testing)
   - ✓ UAT (User Acceptance Testing)
   - ✓ PROD (Production)
   - ✓ DR (Disaster Recovery)

3. **Testing & Documented Results:**
   - ✓ ***https://shorturl.at/oQw5C***

Testing Area	Goal	Tools Used
Functional Testing	Ensure features (e.g., product listing, cart) work as intended.	Postman, Cypress, React Testing Library
Error Handling	Verify fallback UI and error messages for API failures.	Custom logs, React testing
Performance Testing	Optimize speed, minimize resource usage, and test load times.	Lighthouse, GTmetrix
Cross-Browser/Device	Validate functionality on major browsers and devices.	BrowserStack, physical devices
Security Testing	Scan for vulnerabilities and ensure secure data handling.	OWASP ZAP, Burp Suite
User Acceptance Testing	Simulate user actions to verify workflows are smooth and intuitive.	Manual Testing
Documentation Updates	Record findings, results, and resolutions in a professional format.	Markdown, CSV

4. **Created Documentation, Performance & Test Case Report:**
   - ✓ ***https://shorturl.at/RsYV6***

5. **Organized Files in GitHub Repo:**
   - ✓ ***https://shorturl.at/0mVQo***

   README.md:
   - ✓ ***https://shorturl.at/C2cR9***

6. **All Day 1 - 6 Documents:**
   - ✓ ***https://tinyurl.com/2z7cfpzh***
